

ERA-NET NEURON

Partnering

The ERA NET NEURON's aim is to facilitate excellent research on brain related diseases and ELSA research by enabling collaborations between scientists and other stakeholders across national borders.

To assist potential applicants in finding suitable partners a new tool has been established to increase networking <https://partnering.pt-dlr.de/neuron>.

Register and find collaboration offers!

Publish your profile and present your expertise.
Check out potential contacts within the field of neuroscience, ELSA and beyond.

Search for potential new partners from academia, industry, patient organizations and others:

Using the "regard filtersettings" option you can specify your search and filter for specific keywords.

Once registered the tool assists you in finding suitable cooperation partners also for future calls, if required.

Register here now!
